The following have been identified as significant environmental aspects for the site:

These aspects shall be managed with the environmental protection measures outlined on this plan.

### Management

<table>
<thead>
<tr>
<th>Risk:</th>
<th>Noise</th>
<th>(\text{EPA Victoria and Council requirements must be adhered to in relation to the level of noise and working hours, to ensure that residents and other applicable neighbours to the site are not disturbed unreasonably. The generation of noise must be minimised.})</th>
</tr>
</thead>
<tbody>
<tr>
<td>Risk:</td>
<td>Dust</td>
<td>(\text{Dust generation must be minimised to ensure there is no health risk or loss of amenity.})</td>
</tr>
<tr>
<td>Risk:</td>
<td>Erosion and Sediment</td>
<td>(\text{Erosion and sediment must be managed in accordance with current best practice environmental management practices, to prevent sediment-laden water from entering any drainage system or natural waterway.})</td>
</tr>
<tr>
<td>Risk:</td>
<td>Waste</td>
<td>(\text{Litter and waste must be contained on site, before disposal in a responsible manner. Waste generation must be minimised.})</td>
</tr>
</tbody>
</table>

### Site EMP A1 Plan (1)- Types and Locations of Environmental Protection Measures

| Risk: | Chemicals | \(\text{Storage and spill management practices must be implemented to ensure that no environmental damage can result from the escape or spillage of chemicals or fuels.}\) |

### Other Site Specific Issues

<table>
<thead>
<tr>
<th>Risk:</th>
<th>Significant Flora/ Fauna</th>
<th>(\text{All significant flora and fauna on and adjacent to the site must be protected.})</th>
</tr>
</thead>
</table>

| Risk: | Archaeological Heritage | \(\text{Places, sites and objects of archaeological or heritage significance must be protected.}\) |

---

I have read this Environmental Management Plan and agree to undertake works and ensure sub-contractors undertake works in accordance with this plan.

# RISK ASSESSMENT CHECKLIST

## Noise
- Nature of Noise Generating Works
- Potential Noise Receptors
- Proximity of Noise to Noise Receptors
- Extent of Proposed Works
- Wind Conditions

## Dust
- Nature of Dust Sources
- Potential Dust Receptors
- Proximity of Dust to Dust Receptors
- Extent of Proposed Works and Duration of Time Proposed
- Dust Conditions

## Erosion and Sediment
- Nature of Erosion and Sediment Sources
- Potential Erosion and Sediment Receptors
- Proximity of Erosion and Sediment to Erosion and Sediment Receptors
- Extent of Proposed Works and Duration of Time Proposed
- Soil Type and Erosivity
- Erosion and Sediment Sources
- Potential Erosion and Sediment Receptors
- Proximity of Erosion and Sediment to Erosion and Sediment Receptors
- Extent of Proposed Works and Duration of Time Proposed
- Slope
- Site Drainage Regime
- Rainfall
- Extent of Proposed Works
- Duration of Proposed Works

## Waste
- Nature of Waste to be Generated
- Potential Waste Receptors
- Proximity of Waste to Potential Waste Receptors
- Extent of Proposed Works
- Duration of Proposed Works

## Chemicals
- Types of Chemicals and Fuels Used and/or Stored On Site
- Potential Chemical Receptors
- Proximity to Potential Chemical Receptors

## Significant Flora/ Fauna
- Types of Flora/ Fauna
- Vulnerability of Flora/ Fauna
- Proximity of Flora/ Fauna to Works
- Work Activities Which May Threaten Flora/ Fauna
- Potential Impacts on Flora/ Fauna

## Archaeological Heritage
- Nature and Cultural Significance of Proposed Works
- Survey or Assessment Conducted
- Probability of Encountering Archaeological Heritage Items During Works
- Types of Archaeological Heritage Items
- Potential Impact on Archaeological Heritage Items
- Potential Threat to Cultural Significance of Proposed Works
- Extent of Proposed Works
- Duration of Proposed Works

---

Project Name: Site EMP A1 Plan (2) - Risk Assessment and Designs of Environmental Protection Measures

Date and Revision:

Environmental protection measures shall be constructed in accordance with the following designs.

DESIGNS HERE
